DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.

Response to Amendment

2. The affidavit under 37 CFR 1.132 filed July 10, 2006 is insufficient to overcome the rejection of claims 1 and 2 based upon the Ichikawa et al. reference applied under 35 U.S.C. 102(b) as set forth in the last Office action because: It refer(s) only to the system described in the above referenced application and not to the individual claims of the application. Thus, there is no showing that the objective evidence of nonobviousness is commensurate in scope with the claims. See MPEP § 716.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Ichikawa et al. (JP 07-161100).

Regarding claim 1, Ichikawa et al. discloses a video editing device comprising: insert data reading means for receiving insert data (paragraphs [0012], [0020], and [0021]); underlying data reading means for reading underlying data recorded on a recorded medium (paragraphs [0012], [0020], and [0021]);

data checking means for, prior to recording the insert data on the recording medium, a) checking whether the underlying data is validly continuous, and b) comparing signal formats including data transfer rates between the insert data and the underlying data to determine whether the underlying data and the insert data have a common format (paragraphs [0012], [0020], [0022], [0026] – recording mode code, [0030], and [0036] – track speeds) warning indicating means for issuing a warning when the checking or the comparing indicates incompatibility between the underlying data and the insert data (paragraphs [0022] and [0023]); inserting means for inserting the data into the underlying data after the checking and the comparing indicates compatibility between the underlying data and the insert data (paragraph [0021]); and edited data recording means for insert recording data output from the inserting means on the recording medium (paragraph [0021]).

Regarding claim 2, claim 2 is a method claim corresponding to the apparatus claim 1. Therefore, claim 2 is analyzed and rejected as previously discussed with respect to claim 1.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
